Email us!

According to information provided to our Center, changes will be implemented throughout Arkansas in regards to the educational co-ops. We are willing to work with K-12 educators around the state to try and fill in where we can – from providing professional development opportunities for teachers to providing conferences / competitions for students to speaking to classes and hosting workshops at schools about topics such as personal finance, budgeting, economics, the stock market, entrepreneurship, critical thinking, teamwork, and planning for their futures. Please do not hesitate to reach out to us if you would like for us to assist or if you have ideas on ways we could do more for our educators.
